3. System Design Document

In the **system design document**, we are going to speak about the six pieces of information by following an agent-based development methodology (i.e., GAIA), and create the analysis and design documents specified by the GAIA methodology. This section includes: [Goal hierarchy](#), [Agent system architecture](#), [Role identification](#), [Agent description](#), [Agent internal architecture](#), and finally [Technology overview](#).

3-1. How to proceed?

3-2. System Architecture

3-3. Roles Identification

3-4. Agents Description

3-5. Agents Internal Architecture

3-6. Technology Overview
